Professional Summary

Full Stack Developer with almost 4 years of experience at CARE Pvt. Ltd., building and supporting a Lawful Interception monitoring platform used by a national law enforcement agencies - React.js and TypeScript on the frontend, Spring Boot microservices with Kafka and Keycloak on the backend, and MongoDB running sharded and replicated across two regions. Involved from early development through deployment on offline, air-gapped servers, and continued supporting the system in production - fixing issues, training end users, and keeping legacy services running after most of the original team moved on. Seeking a role with more room to keep growing technically.

Core Competencies

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Material UI, Redux Toolkit, HTML5, CSS3, Responsive Design

Backend: Java, Spring Boot, Spring MVC, Spring Security, Spring Data (MongoDB & JPA), RESTful APIs, Microservices Architecture

Messaging & Auth: Apache Kafka, Keycloak

Databases: MongoDB (Sharding & Replication), MySQL

DevOps & Tools: Docker, Nginx, Git, Postman, Linux server, offline/air-gapped deployment

Other: C# (.NET console applications - working knowledge)

Professional Experience

Center for Advanced Research in Engineering (CARE Pvt. Ltd.) – Islamabad, Pakistan

Senior Design Engineer (Full Stack Developer) | 09/2024 – Present

Design Engineer (Full Stack Developer) | 09/2022 – 09/2024

- Owned end-to-end frontend development for a new enterprise Lawful Interception monitoring and compliance platform used by national law enforcement agencies, built with React.js, TypeScript, Redux Toolkit, and Material UI.

- Designed and built RESTful microservices in Spring Boot, integrating Apache Kafka for asynchronous inter-service event streaming and Keycloak for centralized authentication and authorization.

SAAD RASHID

Full Stack Developer - React & Spring Boot

- Implemented and maintained a MongoDB data layer with sharding and replication across geographically distributed network elements, mediation servers, and interception gateways - including diagnosing and fixing replication/sharding issues during field support.
- Integrated the React frontend with 8+ Java/Spring Boot microservices and legacy .NET/C# console applications to support real-time telecom data monitoring workflows.
- Owned the full deployment lifecycle: built and packaged JAR artifacts and frontend builds, containerized services with Docker, configured Nginx, and deployed to offline/air-gapped production servers.
- Performed the manual testing across the full stack alongside teammates prior to each production rollout.
- Delivered post-deployment field support: on-site troubleshooting, end-user training, and feature enhancements driven directly by client feedback.
- Assumed maintenance ownership of legacy production systems (SCO Mobile, PTCL NGN & WLL, Cybernet) following team attrition, becoming the primary technical point of contact for the entire Lawful Interception product suite.
- Write automation scripts to manage log rotation and disk space on production servers, reducing recurring manual maintenance.

Education

Bachelor of Science in Software Engineering

COMSATS University Islamabad | 09/2018 - 06/2022

Key Projects

Falcon Target - Bullet Localization System | Python (Reflex), Recharts, SQLite

- Built a web application visualizing bullet impact coordinates on a target board using interactive charts, with dashboards for shooting sessions and performance analytics.

IJournalist - AI News Sentiment Analysis Platform | React.js, AI/LLM Integration

- Built the frontend for a platform analyzing sentiment across multi-source news articles, including dashboards, trend reports, and keyword-based filtering.
