Professional Summary

React and Spring Boot Developer with 3+ years of experience building and maintaining enterprise-grade applications in secure, on-premise environments. Experienced in developing modern React frontends, designing REST APIs with Spring Boot, and working with MongoDB in microservices-based systems. Comfortable handling full development cycles including implementation, deployment, and post-release support. Strong problem-solving skills with the ability to work independently on complex systems.

Core Competencies

Frontend: React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Material UI, Redux Toolkit, HTML5, CSS3, Responsive Design

Backend: Java, Spring Boot, Spring MVC, Spring Security, Spring Data MongoDB, Spring Data JPA, RESTful APIs, Microservices Architecture

Databases: MongoDB, MySQL

DevOps & Tools: Docker, Nginx, Git, Postman, Apache Kafka, Keycloak

Soft Skills: Problem Solving, Team Collaboration, Client Communication

Professional Experience

Center for Advanced Research in Engineering (CARE Pvt. Ltd.) – Islamabad, Pakistan

Senior Design Engineer (React & Spring Boot Developer) | 09/2022 – Present

- Developed and maintained the frontend of an enterprise telecom monitoring system using React.js, TypeScript, Redux Toolkit, and Tailwind CSS.
- Designed and implemented backend REST APIs using Spring Boot and MongoDB.
- Worked within a microservices architecture integrated with Eureka Server, Config Server, and API Gateway.
- Integrated frontend components with backend services while ensuring secure data handling and authentication.
- Deployed applications in air-gapped environments using Docker, Nginx, and Spring Boot JAR deployments.
- Provided field support, troubleshooting, and user training after deployment, and implemented feature enhancements based on client feedback.

SAAD RASHID

React & Spring Boot Developer

Education

Bachelor of Science in Software Engineering
COMSATS University Islamabad | 09/2018 - 06/2022

Key Projects

PTCL IMS Lawful Interception System

Tech: React.js · Spring Boot · MongoDB · Apache Kafka · Keycloak · Docker · Material-UI

Role: Frontend Development · Backend Development · Database Integration · Deployment · Field Support

- Contributed to the development of a secure telecom monitoring and compliance platform used in a microservices environment.
- Developed data visualization dashboards and user interfaces using React and Material-UI.
- Implemented backend APIs using Spring Boot and integrated MongoDB for data storage.
- Worked with Apache Kafka for event streaming and Keycloak and Spring Security for authentication and authorization.
- Assisted in deployment and provided field support and troubleshooting during system rollout.

Falcon Target - Bullet Localization System

Tech: Python (Reflex) · Recharts · SQLite

Role: Frontend Development · Backend Logic

- Built a web application to visualize bullet impact coordinates on a target board using interactive charts.
- Implemented dashboards showing shooting sessions and performance analytics.
- Developed backend logic using Python Reflex to manage sessions and process coordinate data.

IJournalist - AI News Sentiment Analysis Platform

Tech: React.js · AI/LLM Integration · Data Visualization

Role: Frontend Development

- Developed the frontend of an AI-powered platform that analyzes sentiment of news articles from multiple sources.
- Built dashboards to display sentiment analysis results, article insights, and trend reports.
- Implemented keyword-based filtering and interactive UI components to help users analyze large volumes of news data.
